

# Company Profile

## Location

Located in Sandrigo since 1979, Edilfloor SpA manufactures a wide range of nonwoven textile products including geotextiles, geogrids, geocomposites and technical textiles to suit various geotechnical, technical, acoustic and industrial applications.

Over the past 30 years Edilfloor SpA has been active in the continuously developing market of geosynthetics and has a current production capacity of over 70 million square meters.

Backed by an aggressive "strategy for quality", Edilfloor is ISO 9001 certified and applies this quality philosophy throughout its organisation from production through to sales and customer services.

This strategy has been, and remains a significant factor in Edilfloor's success.
